Service Solutions

REPAIR, CALIBRATION, INSTALLATION & COMMISSIONING, UPGRADE / MODERNIZATION, TRAINING, SPARE PARTS & SUPPLIES

HV TECHNOLOGIES, Inc. has built its high reputation over the years by providing superior services and assistance to our customers. Our goal is your satisfaction with every interaction with our company. HVT is able to deploy support services when you need it. Our talented and experienced field staff comes from a deep pool of service engineers that spans the globe, providing HV, EMC, and Software support for installation, training, and repair for all the solutions we provide. Our customers can have their equipment serviced directly from our service facility in Virginia.

ISO 9001 certified quality management processes highlight our commitment to quality. Our staff fully embraces the concept of quality through continual improvement. We strive to provide our customers a consistent and rewarding experience from our products and services and continued customer satisfaction is the ultimate goal of our quality management system. Our **A2LA ISO 17025** accredited calibration laboratory further highlights our commitment to providing the best services available. Our goal is your satisfaction with every interaction with our company.

Repair

In the field or in-house, HVT provides the expertise for repairing your equipment in a timely manner. We understand when you are not testing you may be losing revenue. We work with you to conduct self-diagnosis of the problem and if you are not able to make the repair we will travel on-site to provide assistance or schedule to have the equipment worked on in an expedient fashion in our laboratory in Manassas, VA. Consulting with you to find the fastest method to have you testing again and the best price determines our course of action.

Calibration

For every HV and EMC test system we can provide a calibration report to the factory specifications traceable to national standards. Each calibration includes verification of factory settings and operational parameters with adjustments and upgrades of firmware conducted when required. Our commitment to service means that HVT is constantly growing our scope for A2LA accredited ISO 17025 calibrations.

Service Solutions

Installation & Commissioning

Our team of Field Service Engineers can provide installation services to ensure your new test equipment is operating to its fullest capabilities. During the commissioning of the system, our engineers will:

- Inspect your site for optimum performance of the system
- Supervise the erection/installation of all equipment
- Supervise the connection of all cable and grounding systems
- Perform functional tests to ensure proper operation
- Provide a report to illustrate the system is functioning correctly

Upgrade / Modernization

Many systems our customers are using have been in the field for many years and can continue to function accurately and reliably with an upgrade to the electronics, control system or software. HVT will provide you with the service and equipment necessary to modernize your equipment in a cost effective manner with a minimum impact to your business. We will work with you to plan upgrade of controls, retrofitting using computerized automation systems, and replacing or expanding of measuring systems to the newest generation according to the latest standards.

Training

We offer training to compliment your own knowledge through theoretical and practical sessions backed by our knowledge and experience of countless years of testing and operation of HV and EMC test equipment. Our training is tailored to your specific needs and level of understanding. We offer this service both at our laboratory in Manassas, Virginia, or at your location.

Spare Parts & Supplies

Whether you need a new test cell for your oil tester or a grounding rod for your impulse system, if we don't have the part in stock we can help you get what you need. For individual stocked components or assemblies, call for quotes and information.
